App Store: Books-translater | TranslateLearn | AI Deep Scanner

PROFESSIONAL SUMMARY

Independent iOS/macOS app developer and technical operations professional with 20+ years across shipping operations, logistics, offshore technical registration, and mobile app development. Published App Store apps including Books-translater, TranslateLearn, and AI Deep Scanner. Strong fit for AI evaluation, mobile QA, localization QA, test case execution, content assessment, and iOS/macOS app review work requiring accuracy, structured judgment, English communication, and disciplined issue reporting.

CORE SKILLS

iOS QA | macOS QA | AI Response Evaluation | Localization QA | Manual Testing | Bug Reporting | Test Cases | Exploratory Testing | App Store Review Readiness | Xcode | Swift/iOS Development | OCR and Translation Apps | LiDAR/Camera Workflows | English-Vietnamese Review | Technical Documentation | Microsoft Office

SELECTED APP PROJECTS

Books-translater - macOS Books & Education App *Solo Developer | App Store, v1.0.1*

- Published a macOS reading workspace for EPUB/PDF import, side-by-side source/translation reading, notes, highlights, search, and translated working-copy export.
- Tested document import, local library metadata, Apple Translation/on-device language package behavior, long-form reading UX, and multi-language workflows.

TranslateLearn - iOS Education App *Solo Developer | App Store, v3.0*

- Built and published a language learning app with live conversation translation, vocabulary review, quiz learning, OCR, voice input, text-to-speech, and offline language packs.
- Designed QA flows for translation accuracy, audio playback, OCR capture, vocabulary saving, subscription behavior, and offline/online mode switching.
- Handled App Store release updates, privacy links, support pages, performance fixes, and user-facing product copy.

AI Deep Scanner - iOS Graphics & Utility App *Solo Developer | App Store, v1.0.3*

- Published an AI and machine-learning oriented scanning app for converting photos, sketches, and engineering drawings into CAD/PDF/Word/Excel-style outputs.
- Worked with OCR, document scanning, file preview/share flows, cloud processing behavior, LiDAR/TrueDepth device constraints, and subscription plan logic.
- Validated edge cases across device capability, input quality, export formats, and user guidance for hardware-dependent features.

PROFESSIONAL EXPERIENCE

Phateco Company - Technical Register / NDT Agent Support *2023 - Present*

- Support technical registration activity for offshore drilling environments as an agent working with class organizations including Lloyd's Register, ABS, and Bureau Veritas.
- Prepare and check technical information with high attention to detail, documentation accuracy, safety context, and field communication.

Independent iOS and Web App Developer *2019 - 2022*

- Studied and built iOS/web applications independently, using Xcode and mobile development workflows from prototype through release preparation.
- Practiced product testing, UI review, bug reproduction, feature validation, and technical learning across iOS and Android Studio environments.

Viettel Post - Logistics / Forwarding Branch Setup *2015 - 2018*

- Opened and supported new logistics/forwarding branches in Southern Vietnam; coordinated service process improvement across local branches.
- Worked with third-party software teams to build and improve management systems for logistics operations.

Mediterranean Shipping Company (MSC) - Operations & Logistics *2003 - 2014*

- Progressed through team leader and vice-manager responsibilities in vessel operation, loading/discharge coordination, equipment control, MNR, detention recovery, and container release.
- Produced operational reports and coordinated with port, depot, customer service, Singapore office, and Geneva head office stakeholders.
